PA1 Final Report

Assumptions we made:

- Adding a friend is a two-way relationship

- a user is unable to like a photo more than once

- the user is not able to comment with '*'.

- Album names and insertion of photos into albums must be done at the time of album creation

- Cannot delete comments

- Cant unlike a photo

- If you create a new album and select a photo in an existing album it moves that picture to the new album

Limitations: As far as we know, we implemented all of the functions and do not have any limitations when it comes to the requirements of the project.
